Education

Heidelberg University

Master's degree in Scientific Computing

Heidelberg, Germany

2023.4 – 2026.4

- Graduated with overall grade **1.3/1.0** (German scale, “sehr gut”; 1.0 = highest)
- Master's thesis: *Digesting Cell Segmentation in Spatial Transcriptomics via Graph Representation Learning* (grade 1.3), advised by Elyas Heidari and Prof. Moritz Gerstung
- Application area: Economics (Grade: 1.35)
- Relevant coursework: Generative neural network (1.0), Theory of deep learning (1.0), Infinite dimension optimization (1.3), NLP with Transformer (1.3), Mathematical machine learning (1.3)

Tsinghua University

Bachelor's degree in Industrial Engineering

Beijing, China

2017.7 – 2021.6

- Average grade: 3.67/4.00 (equivalent to 1.3 in German scale as per APS); minor in Statistics
- Honor: Evergrande Scholarship (top 5% of the cohort)
- Exchange semester: KTH Royal Institute of Technology, Stockholm, Sweden (2019.8 – 2020.1)

Research Experience and Interest

Research Interest:

1. Using geometric deep learning to gain insights from spatial omics data
2. Combination of causal inference and machine learning in medical data, with a focus on identifying causal relationships in observational studies and clinical outcomes

Additional interests: Empirical health economics studies, numerical optimization.

Bibliography

Peer-reviewed articles

Major Research Experience

German Cancer Research Center (DKFZ), Lab of AI in Oncology

Segger: cell segmentation of imaging-based spatial transcriptomics data — Master's thesis

Heidelberg, Germany

2025.3 – 2026.3

- Built a heterogeneous graph neural network with cross-modal attention over individual transcripts and cells to improve transcript-to-cell assignment

- Achieved high-precision cell segmentation on spatial transcriptomics data; work forms part of the Segger project, manuscript in review at **Nature Methods**

Heidelberg Institute of Global Health (HIGH)

Heidelberg, Germany

Time-encoding benchmark for mortality risk prediction

2026.1 – 2026.6

- Systematically compared four time-encoding strategies (decoupled sinusoidal, learnable positional embeddings, text serialization, LLM encoding) for mortality risk prediction on UK Biobank (n=124,158)
- Best-performing approach improved C-index by +0.008 over baseline (bootstrap p<0.001)

Universität Heidelberg

Heidelberg, Germany

Deep Generative Models: generative assignment flows for representing discrete data

2024.9 – 2025.3

- Introduced a novel generative model for the representation of joint probability distributions of discrete random variables by projecting high-dimensional flow matching

Chinese Academy of Medical Sciences & Peking Union Medical College (CAMS&PUMC)

Beijing, China

Exploring COPD patient clusters and associations with health-related quality of life

2023.12 – 2025.3

- Co-first author; published in **Engineering** (2025)
- Led the clustering analysis (k-means, hierarchical clustering, latent class analysis) on a nationwide COPD cohort (n>10,000); identified four clinical phenotypes and quantified their association with health-related quality of life (EQ-5D)

Chinese Academy of Medical Sciences & Peking Union Medical College (CAMS&PUMC)

Beijing, China

Preferences and willingness to pay for COVID-19 vaccine among adults in China

2020.12 – 2024.6

- First author; published in **PLOS Global Public Health** (2024)
- Quantified vaccine preference using a mixed logit model on a nationally representative discrete choice experiment sample (n=12,000)
- Contributed to 5+ peer-reviewed publications (incl. Lancet Global Health, JMIR) during a research assistantship at CAMS&PUMC, 2021–2023

Skills and Interests

- **Technical:** Python (pandas, numpy, scikit-learn, PyTorch, Streamlit, Plotly), R, SQL, MATLAB, C/C++, TypeScript/JavaScript, LaTeX
- **Methods:** Graph neural networks, mixed-effects models, discrete choice experiments / mixed logit, survival analysis, Bayesian statistics, clustering, optimal transport, reinforcement learning
- **Languages:** Fluent in English, Chinese (native), intermediate German (B1)
- **Interests:** Marathon running, badminton, swimming
